

FGA-40MF

Order No.: 0213050

PRODUCTINFOS

Ground isolator,

compact design, for preventing signal interference and hum loops which may occur, e.g. when connecting PC sound cards or laptops to an amplifier.

- Galvanically isolated inputs and outputs
- 2 RCA jacks
- 2 RCA plugs
- Input/output impedance: 20 k Ω
- Frequency range: 20-30,000 Hz
- THD: < 0.01%
- Transmission ratio 1:1
- Ø 24 mm x 38 mm, 32 g
- Length including connection cable: approx. 40 cm

“There are many little helpers available for studio, stage and home stereo systems. With the FGA-40MF, the product range from MONACOR includes a special transformer for unbalanced stereo line signals which is an easy-to-use aid of compact size for the protection against ground loops. And, does it work? Of course, it

does. This device prevents any hum noise previously heard when using a standard cable with stereo RCA connectors in both directions. Oh, by the way: in addition to models with RCA plugs and RCA jacks, MONACOR also offers them with plugs only or with mini connectors for computers or MP3 players.”

TECHNICAL SPECIFICATIONS

FGA-40MF

Description	ground isolator
Frequency range	20-30,000 Hz
Input impedance	20 kΩ
Output impedance	20 kΩ
Transmission ratio	1:1
THD	< 0.01%
Admiss. ambient temp.	0-40 °C
Dimensions	Ø 24 mm x 38 mm
Weight	32 g
Inputs	1 x RCA plug L/R, 1 x RCA inline jack L/R
Outputs	1 x RCA plug L/R, 1 x RCA inline jack L/R
