Order No.: 0281610

PRODUCTINFOS

Alkaline batteries AA size,

from PANASONIC.

- For consumers with high power consumption
- Long storage life
- 4 pcs.

It is advisable to use new alkaline batteries for each live performance. Of course, the application of rechargeable batteries is still possible. However, alkaline batteries are clearly beneficial. Beside the longer life, the main difference can be noticed with decreasing capacity. With rechargeable batteries an immediate loss of performance occurs due to the discharging characteristics. The operating voltage cannot be maintained. The voltage of alkaline batteries drops gradually and there would be sufficient time to prepare for a change. Thus, the low-battery indication only works reliably with alkaline batteries.

TECHNICAL SPECIFICATIONS

LR-6

Rated voltage	1.5 V
Type	AA size
IEC	LR6
ANSI	AA
Capacity	3,400 mAh
Technology	alkaline-manganese
Quantity	4
Dimensions	Ø 14 mm x 50 mm
Weight	25 g/pc.
Other features	non-rechargeable
